March 30, 2022

Terra Linda High School Gym + Frontage Update

Terra Linda High School's Competition Gym and Frontage Improvements are well underway. We're expecting project completion by late Fall 2022. Here's a quick update of some changes that we want to make sure you're aware of while we're under construction.

With the purpose of improved educational learning environments, the construction work will be progressing in two phases. Please expect street parking to be significantly reduced for the remainder of the construction period. Sidewalks next to campus will be closed and pedestrians will need to use the sidewalk across the street, on the east side of Nova Albion Way.

Phase 1 – Staff and District Office Parking Lot – From 04/2022 to 08/2022

Driveway entrances and exits will be slightly constricted (not blocked) during the school day. They will be fully open during drop-offs and pick-ups. Utility poles will begin to be undergrounded during this phase. Parents dropping off their students in the morning and picking up in the afternoon should only access the roundabout. Only staff should enter the parking lot.

Phase 2 – Student Parking Lot - From 04/2022 to 09/2022

Students should use the pathway inside of the football/track stadium to access the campus, rather than walking through the center of the drive aisles with oncoming vehicle traffic. Street parking in this stretch of Nova Albion Way will not be available. Fifteen student parking spaces will be blocked off. Please plan accordingly for delays in your school arrival time.

At the conclusion of these improvements, the campus will have a more open and welcoming appearance with safe pedestrian, bicycle, and vehicle access. See diagram on next page.

On behalf of our students, thank you in advance for your support, patience, and commitment to this process.
There will be three new crosswalks with bulb-outs (marked in **pink**) constructed on each side of Nova Albion Way. The new entrance is marked in **orange**. The new exit is marked in **blue**. The Marin Transit bus stop location is marked in **red**.
